

# Integration Platform as a Service (iPaaS)

AutomationEdge iPaaS has ETL capabilities. ETL helps in real time integration and scalability to meet the high volume of data extraction, transfer and loads.

## AutomationEdge ETL and iPaaS

AutomationEdge iPaaS is a cloud and on premise platform to connect applications, data processes and service-oriented architectures. It supports integration of cloud-cloud, cloud-premise, premise-premise and business-business integrations.

## Are you ready for faster ROI and lower TCO?

### How AutomationEdge iPaaS can help?

AutomationEdge iPaaS has purpose built integrations to 450+ connector actions for business applications to help you achieve Hyper-automation. An iPaaS customer realizes greater ROI, faster time to value and improved business processes. RPA and iPaaS technologies together can do more than just automation.

450+ Connector actions

Faster Return On Investment

Reduced Implementation Time

Faster processing

Reduced number of RPA bots

### Challenges in Automating with only RPA

- ✓ Large volume of data processing
- ✓ Reports, reconciliation
- ✓ MDM, Fraud Detection
- ✓ APIs are available to target system
- ✓ Cleansing, de-duplication, manipulation and synchronization

AutomationEdge is listed in the ServiceNow Store, Salesforce AppExchange, Cherwell mApp Exchange, Splunkbase, BMC Marketplace.

AutomationEdge has already delivered its innovative solution to large multinationals globally like US Navy, American Express, Capita, Coty, HDFC Life, Smart Dubai Government, Mashreq Bank, Borden Dairy, JW Logistics and Genpact to name a few.
